

Protecting Manufacturing Organizations from Ransomware & Zero-day Attacks

Know your software. Trust your protection.

Virsec's autonomous application control gives organizations granular visibility into the provenance, integrity, and authority of software running on servers.

Only verified and trusted code can run, instantly blocking anything malicious or unauthorized.

Virsec Ensure Operational Continuity and Security

Ransomware Attacks

Stops malware and ransomware in milliseconds with a default-deny, allow-on-trust approach.

Third Party Software Vulnerabilities

Verifies the provenance of all software running and creates trust and change management policies, ensuring a secure ecosystem.

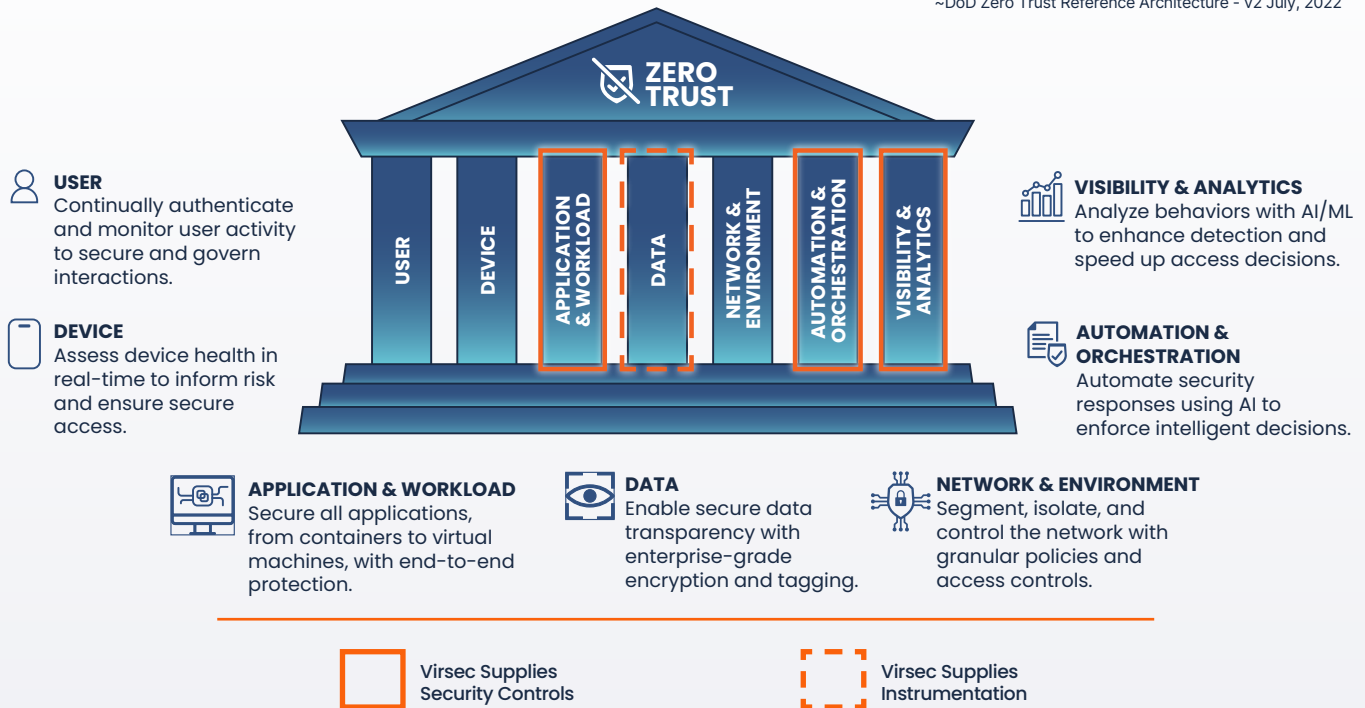

Vulnerabilities and Patching Delays

Provides continuous monitoring and compensating controls for unpatched legacy Windows and Linux operating systems.

Advance Zero Trust Maturity with Virsec

“Never Trust, Always Verify. Deny access by default. Every device, user, application/workload, and data flow are authenticated and explicitly authorized using least privilege, multiple attributes, and dynamic cybersecurity policies.”

~DoD Zero Trust Reference Architecture - v2 July, 2022

Virsec Fills the Gaps where EDRs Fall Short

Manufacturing organizations are frequent targets of ransomware and other sophisticated cyber attacks. As a result, CISOs and CIOs are increasingly diversifying their cybersecurity tools. Virsec solves a critical gap EDRs have:

Protection from Attacks EDRs Miss

Zero-days, LOLBins, Byte Code Malware, & Living off the land

Legacy Operating System Protection

Windows 2003, 2008, 2012 & Linux/RHEL

Provide High Fidelity Alerts

Prioritizes alerts for SOC team with added visibility

Achieve Zero Dwell Time

Virsec blocks attacks in milliseconds

It's always been my business philosophy that we need different layers of protection, and I wanted a defense-in-depth strategy to strengthen our security posture. We deployed the Virsec Security Platform to help my small team be more effective and lower the number of false positives, and it has proven successful in stopping malware exploits targeting Microsoft vulnerabilities.”

~Ronald Bishop, Director of Information Technology, Town of Sahuarita

Safeguard manufacturing operations with Virsec

Protect your organization from ransomware and cybersecurity incidents that impact critical infrastructure that powers manufacturing operations with Virsec's Zero Trust Runtime Defense platform.
